**Daffodil International University**
Department of Computer Science and Engineering
Course Code: BNS101
Course Title: Bangladesh Studies
Quiz: **02** Batch: 70_M
Time: 45 minutes

Marks: 2*7.5=**15**

## Question 1:

A newspaper column states: "More than 65 percent of Bangladesh's population is of working age (15–64). The country has entered a demographic dividend that usually lasts 30–35 years." A university debate team is asked to discuss whether this dividend is being properly utilised.

**Based on the above scenario, answer the following:**

a. Define the concept of "demographic dividend" and show, with supporting data from the lecture, that Bangladesh currently possesses one. **(7.5 marks)** **(CO1)**

b. Propose practical measures through which Bangladesh can convert this large labour force (approximately 66.6 million in 2017) into a sustained economic dividend rather than a burden of unemployment. **(7.5 marks)** **(CO1)**
