1.	***a)***	***Identify** the misspelled words and Subject-Verb Agreement errors in the passage below and record only the correct versions on your answer sheet.* During the recent energy crisis sparked by the global epidamic, many households turned to solar power to ensure a reliable source of electricity. One key component in their systems was the invarter, which converted the direct current (DC) from solar panels into alternating current (AC) suitable for home use.To combat these issues, engineers began developing more advanced hardwaer that could adapt to verying conditions. Many of these new systems used thermaplastic materials for their casings due to their durability, flexibility, and ability to withstand high temperatures. Despite the chaos in the laboratory, the batch of samples collected by the researchers were carefully labeled and stored in the refrigeration unit. Neither the supervisor nor the junior analysts was aware that an error had already compromised the results. Each of the participants, regardless of their academic background or specialization, have submitted a reflective essay, though a number of entries requires further revision. On another note, mathematics appear intimidating at first glance. The data collected from the recent trials suggests a pattern that warrants further investigation.	**[5]**	**CO2**
