Create a database with **your name**. The SQL query to construct the tables are available in the following link –

https://shorturl.at/BBF5q

Now, execute the following queries in SQL-

1. List all **player names** along with the names of their **coaches**.
2. Find **how many** players are trained by each coach.
3. Display the coaches whose salary is above the **average salary** of all coaches.
4. Write an SQL query to find the **coach name** of the player **'Rashid Khan'.**
5. Write an SQL query to find the **country** that has the **highest number of coaches**.
6. Write an SQL query to list all coaches **who do not train any player.**
7. Write an SQL query to display the names of the players whose **country matches the country of their coach**.
