Daffodil International University

Faculty of Science & Information Technology

Department of Computer Science & Engineering

Final Examination, Summer 2026

Course Code: AOL101, Course Title: Art of Living

Level: 2 Term: 2 Batch: 68

Time: 02:00 Hours Marks: 40

Answer ALL Questions

[The figures in the right margin indicate the full marks and corresponding course outcomes. All portions of each question must be answered sequentially.]

1.	Jisan has been invited for the final interview of a multinational company. The interview panel will evaluate not only his technical knowledge but also his attitude, confidence, communication style, and ability to handle unexpected questions. Demonstrate how Jisan can apply impression management and emotional intelligence to create a positive professional image throughout the interview process. Include appropriate verbal and non-verbal communication, emotional control, and professional behavior in your response. Illustrate how you would apply these strategies if you were in a similar situation.	10	CO2
2.	Tushar notices that a large amount of food is wasted during social events in his community. He wants to introduce an initiative that encourages people to reduce food waste. Develop an appropriate action plan by applying relevant 21st Century Skills. Demonstrate how your approach can encourage community participation and create sustainable social impact. Explain how you would implement the proposed initiative.	10	
3.	Prottasha has been assigned to lead a community awareness campaign on environmental protection. The campaign involves multiple activities, including waste management, public participation, volunteer coordination, resource collection, awareness programs, and campaign evaluation. As the number of activities and responsibilities increases, she finds it difficult to understand how they are connected and how each one contributes to the overall success of the campaign. Construct a comprehensive mind map by identifying the central idea, major branches, and supporting sub-branches. Analyze the relationships among the major components and justify how these relationships contribute to the successful implementation of the campaign.	10	CO3

4.	Tithi manages her department's social media page. To publish content quickly, she considers using AI-generated posts without verifying the information. Another team member suggests reviewing and editing the content before publishing. Examine the ethical concerns presented in the scenario. Compare the possible consequences of the two approaches on information credibility and public trust. Determine the more responsible approach with suitable justification.	**10**
