Answer ALL Questions [Optional]

[The figures in the right margin indicate the full marks and corresponding course outcomes. All portions of each question must be answered sequentially.]

1	*a)*	**Identify** the misspelled words in the passage below and underline the correct spelling on your paper. Enginering students learn many important ideas in different fields. In mechanical studies, lubricaton helps machines run smoothly. They also learn about torqe to understand how force works in rotation. Sometimes, students find these topics difficult at first. But with practice, they become easier to understand. Teachers often use simple examples to explain complex ideas. Group study also helps students learn faster. In electrical subjects, frequncy is used to study signals. Devices like a multimetar help measure electrical values. In computer science, abstrction helps simplify complex systems. Programmers also use encapsulaton to organize code. In civil engineering, concret is used in building structures. Workers must ensure proper compaction of soil before construction. In research writing, a clear conclution is very important. Students should avoid plagirism in their work. They should also review their notes regularly. Asking questions in class can improve understanding. Practice and revision are key to success. Checking spelling helps make writting clear and professional.	**10x0.5 =5 Marks**	**CO2**
